**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election of species 1, claims 1, 2 and 5-8 in the reply filed on 12 April 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 5, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kajiwara et al (JP 2000-167767). Kajiwara et al discloses a polishing apparatus 11 comprising a polishing table 14 having a polishing surface 16 attached thereon, a top ring 25 for pressing a workpiece against the polishing surface 16, a vertical moving mechanism 18 operable to vertically move the top ring 25, a bracket 24 vertically movable together with the top ring 25, a stopper 23 adjustable in vertical position to prevent downward movement of the bracket 24, and a control unit 45 operable to adjust the stopper 23 in vertical position. Kajiwara also discloses a method of adjusting above polishing apparatus 11 comprising adjusting the stopper 23 in vertical position a distance between the bracket 24 and the stopper 23 equal to difference between a

height of the lower surface of the housing 34 from the polishing surface 16 at the time of polishing (note Fig. 1-5, paragraph [0017], [0020], [0029] through [0037]).
